Pilgrims Residence, Kazmain

Executive Summary (April 2017)

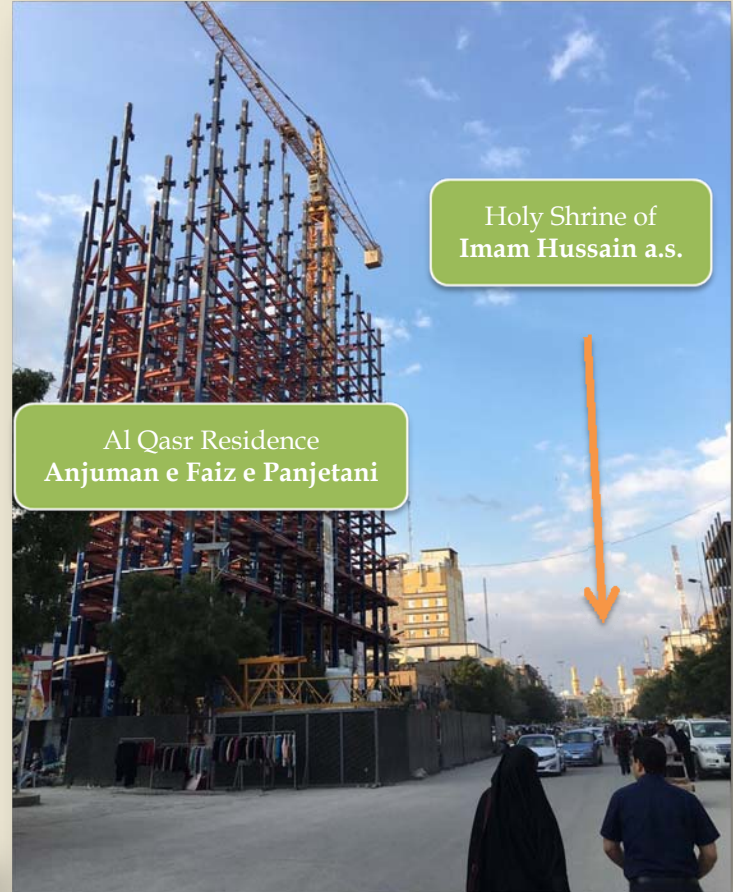

Mobilisation started in December 2015 by completing the survey for the plot borders and setting out the lot limits and erecting the external fencing.

Preliminary pile was executed in January 2016 and a static load test was performed on it in February 2016 in order to confirm the suitability of the initial Design and optimize it. Accordingly, piling works started in March 2016 and was completed by the end of July 2016.

The dewatering system started operating in August 2016. In August 2016, SAMA was awarded the excavation works and breaking head of piles, in addition to dewatering, while “Abo Yaasoub” was awarded the concrete works of the cap beams. “Robouaa Babel” was awarded the block and plaster works, waterproofing, in addition to the concrete works of raft, vertical elements and slab on grade.

In September 2016, installation of steel structure columns started, and the raft foundation was poured in October 2016. The lifts walls were poured in January 2017 and the form work and steel reinforcement for the beams and GF slab were completed. The ramp was poured during this month, and the installation of steel decking for mezzanine and first floors started on the February 5th 2017. As for the steel structure works, installation of the columns for 4th stage up to floor 10 is in progress.
